National Cyber Security Authority (NCSA)
Kigali, Rwanda

Re: Application for Data Protection License

Dear Data Protection Officer,

I am writing to request a Data Protection License for our company, AbyTech Hub Ltd.

AbyTech Hub is an IT solutions and software development company based in Kicukiro, Kigali. We build innovative digital solutions that empower businesses through cutting-edge technology, creativity, and reliable software development. Our services include custom software development, web and mobile application development, and hosting services.

We operate AbyDash, an on-demand marketplace platform connecting customers with local restaurants, supermarkets, shops, and other businesses in Kigali. Our platform enables online ordering and delivery services for our partner merchants.

As part of our operations, we collect and process personal data including customer names, phone numbers, delivery addresses, and order information. We are applying for this license to ensure full compliance with Rwanda's data protection regulations.

We would appreciate guidance on the application process, required documentation, fees, and timeline for license approval.

Thank you for considering our application. Please let me know if you require any additional information.

Best regards,

Sadiki L. Rukara

CEO & Founder
AbyTech Hub Ltd

A handwritten signature in black ink, appearing to read 'Sadiki L. Rukara', with a long horizontal flourish extending to the right.
